Wellness production without any chemicals

Pool DiaClean®

Diamond serves water and wellness

LMP-innovation brings you quiet and wellness pleasure in a clear, sanitized and sweet water.

DiaClean® is a water treatment technology based on diamond electrolysis generating strong disinfectants on the most environmentally friendly way. Its principle avoids any chemical use.

Ideal for skin and health sensitive persons.

The best solution for water sanitization :

- Micro-organisms inactivation up to 5 times faster than chemical chlorine.
- Elimination of algae, lotions and urea,
- Production of disinfecting agents based on active oxygen,
- Immediate and remaining actions.

Exceptional comfort :

- Crystalline, transparent and clean water,
 - No eyes, skin irritation,
 - No allergy thanks to absence of chlorine by-production,
- WD Plug and play systems**

Economical and easy to use:

- Automatic system,
- Running conditions adjustable to the real needs.

Characteristics :

Dimensions (h x l x p)	40x23x16 cm / PS 18x18x8cm / DiaClean®
Weight	12 kg
Inlet voltage	230 VAC +/-10%, 50 Hz
Outlet current	Up to 10,5 ADC per module
Polarity reversal	15 min
Water salinity	0,5 to 1 g/L (half of intracellular water)

DiaClean® systems can be implemented on all existent installation

Remark: No metallic or chemical injection or generation
